Protecting the place
where we live!!!...

304 N. Townline Rd., Ste 1, LaGrange IN 46761-1319*Phone (260) 499-4182 Ext. #7. Fax (260) 499-4189. E-mail: agarcia@lagrangecounty.org

ON-SITE SEWAGE TREATMENT/SEPTIC PERMIT PROCEDURES

FIRST: To receive a septic permit, a soil investigation will need to be completed by a soil scientist. Some scientists who will work in LaGrange County are:

Eickholtz, Inc
Tom Eickholtz, Kendallville
(260) 318-2858
teickholtz@yahoo.com

Schnoebelen's Soil Cons.
Don Schnoebelen, Elkhart
(574) 202-2226
sneb1@comcast.net

Soil Solutions Inc
Tim Monaghan, Valparaiso
(574) 298-1239
tmonaghan@soilsolutions-inc.com

Soils1-Soil Science Experts
Mark S. McClain, Fisher
(765) 212-7645
mmclain1313@gmail.com

Soil Scientist-Dev. Planner
Duane Burrow, Granger
(574) 514-9390
Holymoly_elf@yahoo.com

NEI Soil Consulting
Bill Hartsuff, Angola
(260) 668-9727
neisoilconsulting@gmail.com

SECOND: Once the soil report is completed, a copy must be submitted to the Health Department. The Health Department will determine the type and size of the septic system necessary with respect to the soils information and size of the home. For commercial; the soil borings report needs to be sent to the [INDIANA DEPARTMENT OF HEALTH \(IDOH\)](#) for review, recommendations, and/or blue prints approval.

THIRD: Using the Technical Data Sheet for On-Site Sewage Treatment as a guide, the property owner or the installer (see list of licensed installers) must draw a site plan using the sample enclosed for Gravity Flow System or ask for technical information for Mound, Flood-dosed, Pressure and "wetland" (BETS) systems. The site plan must show the house, septic tank size, trenches area with the boring locations marked, the well location, driveway and any other existing buildings. Distances are important and also are required on all site plans. **A SITE PLAN DRAWING IS REQUIRED TO ISSUE THE SEPTIC PERMIT.**

Additional information to be included in the site plan drawing for the on-site system:

1. Set back distances for any part of the on-site system including the tank, a wetland cell or field trenches:
 - A. From the house, building or any other structure.....10 feet
 - B. From any residential water well (yours or neighbor's)50 feet
 - . From any commercial water well (yours or neighbor's)100 feet
 - C. Property lines.....5 feet
 - D. Lake, pond or other enclosed natural water body.....50 feet
 - E. River, stream, storm water pond, drainage tile, creek or ditch.....25 feet
2. The maximum length of the trenches is 100 feet, and they must be of equal length.
3. If the required system is [mound sand](#), [flood-dosed](#) or [pressure](#) distribution system using a pump, an experienced individual must design the system.

FOUR: The Septic Permit Fee is \$75.00 (Residential) and \$150.00 (Commercial).

FIVE: After the septic system is installed, a FINAL INSPECTION is required before covering any part of the system. The installer (owner or installer licensed) should call the Health Department for a final inspection appointment.

**** IF YOU HAVE ANY QUESTIONS, PLEASE CALL Alf García at (260) 499-4182 Extension 7****
